quot;Ehhh." Just about sums up my feelings about this game. It completely lacks options to turn off the scanlines and other effects you may not want, theres zero controller support. I feel like with a bit more polish and attention this could have been a much more enjoyable title. I realize it costs next to nothing but I still wouldnt really reccommend this as it is

right now. Give it some options and controller support and I'll flip.. This game deserve a lot more bad reviews. A LOT.. I didn't like this game. There's much better Galaga-esque games out there than this one. The intro graphics are pretty nice but the controls are so sluggish, I immediately stopped playing.. Give it some options and controller support and I'll flip.. No controller support. No possibility to change the key mapping. Unplayable. Do not buy. Not even for 49 cents.. Expectations exceeded! Don't expect Star Drifter to play like a u00a30.79 game, everything is done very well and feels solid, the music is good, the graphics are good, the controls are good (given its key based)..
